***Allowable Subject Matter***

1. Claims 1 to 22 are allowed.
2. The following is an examiner's statement of reasons for allowance: A steel plate composition, having a value  $P = 2.5$  and  $4.0$ , and having a microstructure composed of degenerate upper bainite of more than 70%, in which the ratio  $(Hv-avep)/(Hv-M)$  between the average Vickers hardness  $Hv-avep$  in the direction of thickness and the martensitic hardness  $Hv-M$  determined by carbon content is between 0.8 and 0.9, and the transverse tensile strength  $TS-Tp$  is between 880 MPa and 1080 MPa, whereby  $P = 2.7C = 0.4Si + Mn + 0.8CR + 0.45(Ni + Cu) + Mo - 1$  and  $Hv-M = 270 + 1300C$ ; and its method of manufacturing plate; its finished product, a line pipe; and its method of manufacturing line pipe, as recited by claims 1 to 22, is not taught or fairly suggested by the art of record for the reasons stated in Applicant's arguments filed December 10, 2009 as briefly summarized below:
  3. US Patent 5,634,988 to Kurebayashi is directed to steel containing 0.6 to 2.0%Si whereas Applicant's claimed steel contains not more than 0.28%.
  4. US patent 4,591,396 to Mazuda (hereafter "US'396") does not teach or suggest the P-value as defined in the present application. None of the examples exemplified in US'396 meet P value of 2.5 -4.0 together with transverse tensile strength of 880-1080 MPa as evident by attached Figure 1 in Exhibit A submitted by Applicant. In addition, US'396 discloses that the microstructure of the steel contains fine upper bainite or a duplex structure of fine upper bainite and less than 20% of ferrite which is quite different from the present steel having a microstructure composed of primarily degenerate upper

bainite of more than 70%. A degenerate upper bainite as defined by present invention contains MA( martensite-austenite) constituents between lath structures whereas the upper bainite structure is defined as containing cementite between the lath structures according to technical publications cited by Applicant in IDS filed December 10, 2009.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
